This book presents both theoretical contributions and empirical applications of advanced statistical techniques including geo-additive models that link individual measures with area variables to account for spatial correlation; multilevel models that address the issue of clustering within family and household; multi-process models that account for interdependencies over life-course events and non-random utilization of health services; and flexible parametric alternatives to existing intensity models. These analytical techniques are illustrated mainly through modeling maternal and child health in the African context, using data from demographic and health surveys.

In the past, the estimation of levels, trends and differentials in demographic and health outcomes in developing countries was heavily reliant on indirect methods that were devised to suit limited or deficient data. In recent decades, world-wide surveys like the World Fertility Survey and its successor, the Demographic and Health Survey have played an important role in filling the gap in survey data from developing countries. Such modern demographic and health surveys enable investigators to make in-depth analyses that guide policy intervention strategies, and such analyses require the modern and advanced statistical techniques covered in this book.

The text is ideally suited for academics, professionals, and decision makers in the social and health sciences, as well as others with an interest in statistical modelling, demographic and health surveys. Scientists and students in applied statistics, epidemiology, medicine, social and behavioural sciences will find it of value.

### **From reader reviews:**

#### **Kathy Hunnicutt:**

Book is to be different for every grade. Book for children till adult are different content. As we know that book is very important usually. The book Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) had been making you to know about other knowledge and of course you can take more information. It is very advantages for you. The guide Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) is not only giving you much more new information but also for being your friend when you truly feel bored. You can spend your personal spend time to read your guide. Try to make relationship while using book Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis). You never really feel lose out for everything if you read some books.

#### **Dale Randolph:**

Nowadays reading books are more than want or need but also be a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The info you get based on what kind of guide you read, if you want attract knowledge just go with education and learning books but if you want really feel happy read one having theme for entertaining for instance comic or novel. Often the Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) is kind of publication which is giving the reader unpredictable experience.

#### **Pamela Acuna:**

Do you have something that you prefer such as book? The reserve lovers usually prefer to pick book like comic, limited story and the biggest an example may be novel. Now, why not hoping Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) that give your fun preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the means for people to know world better then how they react toward the world. It can't be stated constantly that reading routine only for the geeky person but for all of you who wants to be success person. So , for all you who want to start reading through as your good habit, you are able to pick Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) become your own starter.

#### **Dorothy Saunders:**

Reading a book to get new life style in this year; every people loves to examine a book. When you go through a book you can get a great deal of benefit. When you read guides, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what kinds of book

that you have read. If you wish to get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, such us novel, comics, and soon. The Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) will give you a new experience in studying a book.
