Analysis and Mapping of Animal Movement in R (Chapman & Hall/CRC The R Series) Kamran Safi, Bart Kranstauber

Movement ecology is a deeply interdisciplinary and prolific area of research, requiring skills that combine information technology, data mining, statistics and mathematics, geography, remote sensing, and ecology. The authors elaborate on methods to analyze and visualize animal movement using the software package R. The book will first concentrate on the analysis of trajectories, the paths of individual animals, looking at the geometry and characteristics that can be derived from single trajectories.
