In grammar, tense is the time of a verb's action or state of being, such as present or past. Many contemporary linguists equate tenses with the inflectional categories (or different endings) of a verb. English maintains an inflectional distinction only between the present (for example, laugh or leave) and the past (laughed, left). In this book all the various types of tenses are explained, along with their structure and examples, to help you get a much clearer picture of this important part of speech; it would also provide you the confidence to pick the right type of tense. Though it might seem complicated when you try to glance through the write-up, tenses aren't that difficult to understand; spend some time on each tense mentioned and see yourself framing better sentences than before. The concept of tense in English is a method that we use to refer to time - past, present and future. Many languages use tense to talk about time. Other languages have no concept of tense at all, but of course they can still talk about time, using different methods.
