Introduction to Clustering Large and High-Dimensional Data

Jacob Kogan

Introduction to Clustering Large and High-Dimensional Data Jacob Kogan
There is a growing need for a more automated system of partitioning data sets into groups, or clusters. For example, digital libraries and the World Wide Web continue to grow exponentially, the ability to find useful information increasingly depends on the indexing infrastructure or search engine. Clustering techniques can be used to discover natural groups in data sets and to identify abstract structures that might reside there, without having any background knowledge of the characteristics of the data. Clustering has been used in a variety of areas, including computer vision, VLSI design, data mining, bio-informatics (gene expression analysis), and information retrieval, to name just a few. This book focuses on a few of the most important clustering algorithms, providing a detailed account of these major models in an information retrieval context. The beginning chapters introduce the classic algorithms in detail, while the later chapters describe clustering through divergences and show recent research for more advanced audiences.

From reader reviews:

Evelina Lewis:

The book Introduction to Clustering Large and High-Dimensional Data can give more knowledge and information about everything you want. Why then must we leave the good thing like a book Introduction to Clustering Large and High-Dimensional Data? Some of you have a different opinion about book. But one aim in which book can give many details for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or details that you take for that, it is possible to give for each other; you could share all of these. Book Introduction to Clustering Large and High-Dimensional Data has simple shape however you know: it has great and massive function for you. You can look the enormous world by wide open and read a publication. So it is very wonderful.

Kelly Blow:

Hey guys, do you wants to finds a new book to study? May be the book with the headline Introduction to Clustering Large and High-Dimensional Data suitable to you? The book was written by well known writer in this era. The actual book untitled Introduction to Clustering Large and High-Dimensional Datais the main of several books in which everyone read now. That book was inspired a lot of people in the world. When you read this publication you will enter the new dimension that you ever know previous to. The author explained their plan in the simple way, and so all of people can easily to understand the core of this guide. This book will give you a large amount of information about this world now. To help you see the represented of the world with this book.

Pamela Cole:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book has been rare? Why so many question for the book? But any kind of people feel that they enjoy to get reading. Some people likes looking at, not only science book but also novel and Introduction to Clustering Large and High-Dimensional Data or others sources were given expertise for you. After you know how the good a book, you feel want to read more and more. Science e-book was created for teacher or maybe students especially. Those guides are helping them to increase their knowledge. In additional case, beside science guide, any other book likes Introduction to Clustering Large and High-Dimensional Data to make your spare time far more colorful. Many types of book like this one.

Harry Anderson:

A lot of guide has printed but it differs from the others. You can get it by web on social media. You can choose the top book for you, science, amusing, novel, or whatever simply by searching from it. It is referred to as of book Introduction to Clustering Large and High-Dimensional Data. Contain your knowledge by it. Without departing the printed book, it could add your knowledge and make an individual happier to read. It is most essential that, you must aware about guide. It can bring you from one destination for a other place.
