With the world becoming increasingly dependent on technology, it is not surprise to anyone that IT projects are literally coming out of the woodwork. If that is not a big enough pill to swallow, IT projects, regardless of their particular industry, fail at a higher rate than infrastructure projects. All of this means that the project manager's role is crucial, and is even more crucial when it comes to healthcare IT projects.

Healthcare is a big business and is only continuing to grow. Because of this, technology must adapt and transform to meet the needs of the public. Failed healthcare IT projects are nothing new.
