Building Roads by Hand

International Labour Office

Building Roads by Hand International Labour Office

This book serves as a brief introduction to labour-based road construction. It is prepared especially for use by supervisory staff and civil engineers embarking on labour-based works for the first time and students who need a general introduction to the subject. The book presents the broad technical, organizational and managerial principles of labour-based road construction works. It draws on practical experience of operations involving these techniques, which are illustrated with drawings. The book should be of particular use to those working on AID funded road construction programmes in the Third World.
