Compound Interest Tables

Michael Sherman

Compound Interest Tables Michael Sherman

A handy pocket guide with six major tables: (1) Future value of \$1, (2) Future value of \$1 per period, (3) Sinking fund factors, (4) Present value of \$1, (5) Present value of \$1 per period, (6) Partial Payment to amortize \$1. Tables cover all interest rates from 5% to 20% and include monthly, quarterly, semi-annual, and annual compounding. Each section has a complete description of how those values can be used, the purpose they serve, and examples. Yes, a financial calculator will produce these figures, but it is MUCH easier having them in easy-to-use tables with comprehensive explanations of how to use them.

From reader reviews:

Mitchell Diaz:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make these individuals keep up with the era which is always change and make progress. Some of you maybe will update themselves by studying books. It is a good choice for you but the problems coming to you is you don't know what one you should start with. This Compound Interest Tables is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Annette Spafford:

People live in this new moment of lifestyle always attempt to and must have the extra time or they will get lot of stress from both lifestyle and work. So , when we ask do people have spare time, we will say absolutely of course. People is human not only a robot. Then we inquire again, what kind of activity do you have when the spare time coming to anyone of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, typically the book you have read is usually Compound Interest Tables.

Hayden Wolfe:

It is possible to spend your free time to study this book this book. This Compound Interest Tables is simple to create you can read it in the area, in the beach, train and also soon. If you did not include much space to bring often the printed book, you can buy the particular e-book. It is make you quicker to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Tamara Reams:

As a scholar exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some book, they are complained. Just little students that has reading's internal or real their pastime. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that reading through is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Compound Interest Tables can make you sense more interested to read.
