## **Building the Realtime User Experience** Ted Roden

The Web is increasingly happening in realtime. With websites such as Facebook and Twitter leading the way, users are coming to expect that all sites should serve content as it occurs—on smartphones as well as computers. This book shows you how to build realtime user experiences by adding chat, streaming content, and including more features on your site one piece at a time, without making big changes to the existing infrastructure. You'll also learn how to serve realtime content beyond the browser.

Throughout the book are many practical JavaScript and Python examples for advanced web developers that you can use on your site now. And in the final chapter, you'll build a location-aware game that combines all of the technologies discussed.

- Use the latest realtime syndication technology, including PubSubHubbub
- Build dynamic widgets on your homepage to show realtime updates from several sources
- Learn how to use long polling to "push" content from your server to browsers
- Create an application using the Tornado web server that makes sense of massive amounts of streaming content
- Understand the unique requirements for setting up a basic chat service
- Use IM and SMS to enable users to interact with your site outside of a web browser
- Implement custom analytics to measure engagement in realtime

#### **Omar Lamm:**

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some reserve, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that looking at is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Building the Realtime User Experience can make you experience more interested to read.
