Revealing the astounding mammalian diversity found on the largest Philippine island, *The Mammals of Luzon Island* is a unique book that functions both as a field guide and study of tropical fauna. The book features 120 fully illustrated species profiles and shows how the mammals fit into larger questions related to evolution, ecology, and biogeography. Luzon's stunning variety of mammals includes giant fruit-eating bats; other bats so small that they can roost inside bamboo stems; giant plant-eating rodents that look like, but are not, squirrels; shrews that weigh less than half an ounce; the rapidly disappearing Philippine warty pig; and the long-tailed macaque, Luzon's only nonhuman primate.

While celebrating Luzon's remarkably rich mammal fauna, the authors also suggest conservation strategies for the many species that are under threat from a variety of pressures. Based on a century of accumulated data and fifteen years of intensive study, *The Mammals of Luzon Island* delivers a message that will appeal equally to scientists, conservationists, and ecologically minded travelers.
