Anatomie du corps humain - Atlas d'Imagerie (French Edition) Jamie Weir, Peter H. Abrahams, Jonathan D. Spratt, Lonie R. Salkowski, Fabrice Duparc, John Scott & Co

L'imagerie médicale moderne est la représentation de l'anatomie du corps humain. Par son illustration de cette relation directe, cet atlas permet aux lecteurs de parfaire leurs connaissances dans l'interprétation des projections en imagerie de l'anatomie humaine normale, connaissance essentielle avant de rechercher la représentation des signes de la pathologie. Pour illustrer cette intrication permanente, cet atlas propose :

- une présentation de l'imagerie de l'anatomie de haute qualité dans sept sections topographiques : tête, cou et cerveau ; colonne vertébrale et moelle spinale ; membre supérieur ; thorax ; abdomen et pelvis en coupes ; abdomen et pelvis hors coupes ; membre inférieur ;
- une section complémentaire qui concerne la médecine nucléaire et ses possibilités de représentation de l'anatomie fonctionnelle en complément de l'anatomie morphologique de l'organe ;
- des moyens d'orientation qui facilitent la compréhension des projections dans différentes incidences radiographiques, sur des coupes tomodensitométriques et IRM axiales, coronales et sagittales, et des tables d'ossification pour le développement osseux ;
- des images légendées par de nombreux repères discrets qui préservent leur lisibilité et favorisent l'autoévaluation. L'étudiant et le praticien en exercice trouveront dans cet atlas **une référence permanente pour valider et entretenir leurs connaissances** en anatomie à travers sa représentation fiable par les techniques d'imagerie les plus récentes. **Tous les procédés d'imagerie médicale pour présenter l'anatomie normale du corps humain : radiographie, angiographie, tomodensitométrie, imagerie par résonance magnétique, échographie.**
- Les plus récents progrès en technologie d'imagerie.
- **750 illustrations** d'une clarté exceptionnelle.

In a situation you wish to purchase the e-book, you can start their official web-site in addition to order it. Have a nice learn.

Harry Branham:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just little students that has reading's spirit or real their interest. They just do what the professor want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Anatomie du corps humain - Atlas d'Imagerie (French Edition) can make you sense more interested to read.
