Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation Herbert Robinson, Barry Symonds, Barry Gilbertson, Ben Ilozor

The drive towards environmentally friendly buildings and infrastructure has led to a growing interest in providing design solutions underpinned by the core principles of sustainability to balance economic, social and environmental factors.

Design Economics for the Built Environment: Impact of sustainability on project evaluation presents new directions, reflecting the need to recognise the impact of climate change and the importance of sustainability in project evaluation. The aim is to provide a new approach to understanding design economics in the context of the changing policy environment, legislative and regulatory framework, and increasing economic, environmental and social pressure as result of the sustainability agenda.

The book follows a structured approach from theories and principles in the earlier chapters, to the practical applications and emerging techniques focusing on value and social, economic and environmental considerations in making design decisions. It starts with the policy context, building on various theories and principles such as, capital cost, value of design and resource-based theories, the new rules of measurement (NRM) to explore cost planning, the relationship between height and costs, key socio-economic and environmental variables for design appraisal, eco-cost/value ratio (EVR), whole life theory and the treatment of carbon emission as external costs, productivity and efficiency, fiscal drivers and legal framework for carbon reduction, procurement and allocation of risks in contracts.

Case studies, practical examples and frameworks throughout reinforce theories and principles and relate them to current practice. The book is essential reading for postgraduate students in architecture, building and quantity surveying and is also a valuable resource for academics, consultants and policy-makers in the built environment.

From reader reviews:

Anna Wright:

Book is usually written, printed, or descriptive for everything. You can know everything you want by a e-book. Book has a different type. As we know that book is important issue to bring us around the world. Beside that you can your reading expertise was fluently. A reserve Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation will make you to possibly be smarter. You can feel far more confidence if you can know about almost everything. But some of you think that open or reading a new book make you bored. It is far from make you fun. Why they may be thought like that? Have you looking for best book or appropriate book with you?

Andrea Whitt:

The e-book untitled Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation is the e-book that recommended to you to see. You can see the quality of the publication content that will be shown to a person. The language that writer use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation from the publisher to make you far more enjoy free time.

Harrison Colon:

A lot of e-book has printed but it differs from the others. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever by searching from it. It is known as of book Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation. Contain your knowledge by it. Without departing the printed book, it might add your knowledge and make a person happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination for a other place.

Iva Simmon:

What is your hobby? Have you heard that will question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person similar to reading or as looking at become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You will find good news or update with regards to something by book. Many kinds of books that can you take to be your object. One of them is niagra Design Economics for the Built Environment: Impact of Sustainability on Project Evaluation.
