GAAS (Generally Accepted Auditing Standards) covers the auditing standards, practices and procedures in use today. An audit is a methodical review and an objective examination of an item, including the verification of specific information as determined by the auditor, or as established by general practice. To complete an audit GAAS must be followed and referenced. This book explains and interprets the standards in clear, easy-to-understand language that will enable auditors to save time and perform the auditing job more efficiently.
