Pharmaceutical Suspensions: From Formulation Development to Manufacturing

The suspension dosage form has long been used for poorly soluble active ingredients for various therapeutic indications. Development of stable suspensions over the shelf life of the drug product continues to be a challenge on many fronts. A good understanding of the fundamentals of disperse systems is essential in the development of a suitable pharmaceutical suspension. The development of a suspension dosage form follows a very complicated path. The selection of the proper excipients (surfactants, viscosity imparting agents etc.) is important. The particle size distribution in the finished drug product dosage form is a critical parameter that significantly impacts the bioavailability and pharmacokinetics of the product. Appropriate analytical methodologies and instruments (chromatographs, viscometers, particle size analyzers, etc.) must be utilized to properly characterize the suspension formulation. The development process continues with a successful scale-up of the manufacturing process. Regulatory agencies around the world require clinical trials to establish the safety and efficacy of the drug product. All of this development work should culminate into a regulatory filing in accordance with the regulatory guidelines. Pharmaceutical Suspensions, From Formulation Development to Manufacturing, in its organization, follows the development approach used widely in the pharmaceutical industry. The primary focus of this book is on the classical disperse system – poorly soluble active pharmaceutical ingredients suspended in a suitable vehicle.

From reader reviews:

James Lightle:

Book will be written, printed, or created for everything. You can learn everything you want by a e-book. Book has a different type. As we know that book is important thing to bring us around the world. Next to that you can your reading talent was fluently. A e-book Pharmaceutical Suspensions: From Formulation Development to Manufacturing will make you to end up being smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think that open or reading some sort of book make you bored. It's not make you fun. Why they might be thought like that? Have you trying to find best book or ideal book with you?

Morris Whitfield:

This book untitled Pharmaceutical Suspensions: From Formulation Development to Manufacturing to be one of several books which best seller in this year, that's because when you read this e-book you can get a lot of benefit on it. You will easily to buy this specific book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason to you personally to past this publication from your list.

Harvey Lee:

The book untitled Pharmaceutical Suspensions: From Formulation Development to Manufacturing contain a lot of information on that. The writer explains her idea with easy method. The language is very simple to implement all the people, so do not worry, you can easy to read that. The book was written by famous author. The author will take you in the new era of literary works. It is possible to read this book because you can keep reading your smart phone, or device, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can open up their official web-site in addition to order it. Have a nice examine.

William Lebel:

In this period of time globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The health of the world makes the information better to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The particular book that recommended for you is Pharmaceutical Suspensions: From Formulation Development to Manufacturing this reserve consist a lot of the information on the condition of this world now. This specific book was represented how do the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. The actual writer made some analysis when he makes this book. Honestly, that is why this book acceptable all of you.
