Ontology Matching

Jérôme Euzenat, Pavel Shvaiko

Ontology Matching Jérôme Euzenat, Pavel Shvaiko

Ontologies tend to be found everywhere. They are viewed as the silver bullet for many applications, such as database integration, peer-to-peer systems, e-commerce, semantic web services, or social networks. However, in open or evolving systems, such as the semantic web, different parties would, in general, adopt different ontologies. Thus, merely using ontologies, like using XML, does not reduce heterogeneity: it just raises heterogeneity problems to a higher level.

Euzenat and Shvaiko's book is devoted to ontology matching as a solution to the semantic heterogeneity problem faced by computer systems. Ontology matching aims at finding correspondences between semantically related entities of different ontologies. These correspondences may stand for equivalence as well as other relations, such as consequence, subsumption, or disjointness, between ontology entities. Many different matching solutions have been proposed so far from various viewpoints, e.g., databases, information systems, and artificial intelligence.

The second edition of **Ontology Matching** has been thoroughly revised and updated to reflect the most recent advances in this quickly developing area, which resulted in more than 150 pages of new content. In particular, the book includes a new chapter dedicated to the methodology for performing ontology matching. It also covers emerging topics, such as data interlinking, ontology partitioning and pruning, context-based matching, matcher tuning, alignment debugging, and user involvement in matching, to mention a few. More than 100 state-of-the-art matching systems and frameworks were reviewed.

With **Ontology Matching**, researchers and practitioners will find a reference book that presents currently available work in a uniform framework. In particular, the work and the techniques presented in this book can be equally applied to database schema matching, catalog integration, XML schema matching and other related problems. The objectives of the book include presenting (i) the state of the art and (ii) the latest research results in ontology matching by providing a systematic and detailed account of matching techniques and matching systems from theoretical, practical and application perspectives.

From reader reviews:

Kelley Thornton:

Book is usually written, printed, or created for everything. You can recognize everything you want by a reserve. Book has a different type. As you may know that book is important matter to bring us around the world. Close to that you can your reading talent was fluently. A reserve Ontology Matching will make you to always be smarter. You can feel much more confidence if you can know about every little thing. But some of you think this open or reading a new book make you bored. It isn't make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

Ashley Paul:

What do you regarding book? It is not important with you? Or just adding material when you require something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every person has many questions above. They need to answer that question due to the fact just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this particular Ontology Matching to read.

Fred Ashman:

This book untitled Ontology Matching to be one of several books that best seller in this year, that is because when you read this book you can get a lot of benefit onto it. You will easily to buy this book in the book retail outlet or you can order it through online. The publisher with this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Mobile phone. So there is no reason to your account to past this e-book from your list.

Linda Justice:

Is it an individual who having spare time and then spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Ontology Matching can be the response, oh how comes? The new book you know. You are and so out of date, spending your free time by reading in this fresh era is common not a nerd activity. So what these ebooks have than the others?
